

Scalloped Circle

Will not work in CAP2

1. Draw a square shape
2. Select the scissors and choose a circle with a Bump cut and wavelength 8 and amplitude 6 and punch out a circle.

3. Draw a circle smaller than the scallop circle and place on top of the scallop one.
4. Select both shapes and align them centrally using the align tab.
5. Select the subtract icon on the arrange tab and the circle will be removed.
6. Drag this shape into your stencils for use again.
