

Stacked Photo Frames

Outer only Frame

Make your frame. Then "Convert to Bitmap". Copy your image and then "Paste Special", choosing, "Serif Transparent Bitmap".

Now "Convert to Frame" will appear in the menu. Choose this and then place the resulting frame in your frame tab (It will look as if it is transparent). Now drop your photo into the frame and it will fill the outside of the shape only.

Add shadows etc as usual.

Front Frame
